

# Water Conservation & Safety Guide

Water is one of the most precious resources on Earth. Protecting it is vital for sustainable living.

Follow these essential guidelines for water safety and conservation:

1. Regularly inspect and clean water storage tanks.
2. Filter and purify drinking water to avoid contamination.
3. Harvest rainwater and reuse it for gardening and cleaning.
4. Report leaks and fix them immediately to avoid wastage.
5. Use water-saving appliances to reduce consumption.
6. Educate your community on drought resilience practices.
7. Plan ahead for drought periods with emergency water storage.

Together, we can secure our water future.

Stay informed. Stay safe. Save water.
